Message from the Guest Editor

The upcoming Special Issue of *Applied Sciences* will focus on recent developments in hyperspectral and multispectral imaging and analysis that target quality and safety issues for food and agricultural commodities, detecting chemical and microbial hazards for foods and food ingredients, and advances in hardware and instrumentation, methodology, and practical implementation for non-destructive sensing of food materials. We would like to invite you to submit or recommend original research papers for the "Applications of Hyperspectral Imaging for Food and Agriculture II" Special Issue through our paper submission system.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
