Dear Colleagues,

manufacturing

Prof. Dr. Marcello Braglia

Prof. Dr. Roberto Gabbrielli

Prof. Dr. Marco Frosolini

Deadline for manuscript submissions: closed (25 May 2022) However, while lean principles can be applied in any industry, in an ETO environment, the implementation of both methods and tools must be adapted, and often, new ones have to be embraced. Only by conceiving different new methods and tools is it possible to overcome the major constraints to unfold the full potential of lean manufacturing in nonrepetitive manufacturing environments.

In the last few years, in recognition of the success of the lean manufacturing approaches in the manufacturing

sector, the amount of papers implementing lean

the

repetitive

in engineer-to-order

production

(ETO)

outside

With the primary goal of extending the toolbox available to all practitioners in ETO companies, this Special Issue focuses on the development and implementation of new lean manufacturing tools and methods for manufacturing efficiency in ETO industries.

Editor-in-Chief

Message from the Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec,

CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
