Message from the Guest Editors

Dear Colleagues,

Performing surgery based on facts is an ideal we all strive to achieve. The present Special Issue intends to introduce new manuscripts focused on cutting-edge and rapidly developing treatment modalities and their applications to oral surgery, focusing on evidence-based medicine. Many presume that fake news is not part of medical science. This is not always the reality. Advances in imaging, instrumentation, biomaterials, and techniques bring us closer to effective surgery; however, commercial interests might lead to fake news looking like news. The manuscripts should discuss both the “how to” as well as the “why” behind the concept of evidence-based surgery, explaining the news and ruling out the fake. “Applied Science for Oral Implantology—***Fake vs. News***” will be a useful new guide to a large variety of specialists seeking to refine their clinical expertise on evidence-based medicine. Fake paradigms rejected by evidence-based medicine are highly welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
