

Technological Breakthroughs in Automation and Robotics

Guest Editors:

Prof. Dr. Alexandru Tugui

Department of CIES, Alexandru
Ioan Cuza University, 700505 Iasi,
Romania

Prof. Dr. Dana Danciulescu

Department of Informatics,
Faculty of Science, University of
Craiova, 200585 Craiova,
Romania

Dr. Carlos Viegas

Department of Mechanical
Engineering, University of
Coimbra, 3030 Coimbra, Portugal

Deadline for manuscript
submissions:
closed (20 October 2025)

Message from the Guest Editors

Automation and robotics have seen unprecedented advancements in recent years, driven by technological breakthroughs and innovative applications. These advancements are transforming industries, enhancing efficiency, precision, and productivity across various sectors. Automation systems and robotic technologies are now integral components in manufacturing, healthcare, logistics, agriculture, and beyond. As we progress, the convergence of artificial intelligence, machine learning, and advanced sensor technologies is paving the way for even more sophisticated and autonomous systems. This Special Issue captures the latest advances and prospects in automation and robotics, providing a comprehensive overview of cutting-edge research, technological innovations, and emerging applications.

We invite submissions of original research articles, review papers, and case studies that cover a wide range of topics related to automation and robotics. Potential topics include, but are not limited to, the following:

Innovations in Automation

Robotics Technology Advances

Emerging Applications

Industry 4.0 and 5.0

Future Prospects and Challenges

an Open Access Journal by MDPI

Editor-in-Chief

da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
