## Application of Biomass Energy Technology

Guest Editors:

**Dr. Georgiana Moiceanu**

Department of Entrepreneurship  
and Management, National  
University of Science and  
Technology POLITEHNICA  
Bucharest, 060042 Bucharest,  
Romania

**Dr. Irina Aura Istrate**

Department of Biotechnical  
Systems, National University of  
Science and Technology  
POLITEHNICA Bucharest, 060042  
Bucharest, Romania

Deadline for manuscript  
submissions:

**31 October 2024**

### Message from the Guest Editors

Dear Colleagues,

Our scope includes but is not confined to, investigations into biomass feedstock selection, conversion processes, efficiency enhancements, environmental implications, economic assessments, policy considerations, and emerging trends. Additionally, the carbon cycle, the net energy efficiency of bioenergy systems, sustainability evaluation, and biodiversity concerns are all related to biomass and the environment. Forthcoming research in biomass energy technology should concentrate on the following focal points:

Innovations in conversion processes to maximize energy output and diminish emissions; Sustainable management of feedstock resources and their availability; Integration with other renewable energy sources to fortify a resilient energy grid; Adoption of circular economy principles for waste-to-energy solutions; Technological advancements catering to small-scale, decentralized biomass systems; Holistic evaluations of socio-economic and environmental impacts to uphold sustainability; The production of feedstock in connection to forestry, silviculture, agronomy, and agriculture.

Dr. Georgiana Moiceanu

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**  
Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
