Message from the Guest Editors

Dear Colleagues,

In recent decades, technological evolution has transformed surgical treatments in the urological and andrological field. This progress has led to increasingly less invasive and, at the same time, increasingly precise and accurate surgical strategies, thus obtaining better perioperative and functional outcomes. One of the examples of the technological evolution impact on urological and andrological surgery is represented by the application of laser surgery for the treatment of benign prostatic hyperplasia, lithiasis, as well as genital warts. Therefore, this Special Issue covers the following topics:

- Evolution of laser therapy in urology;
- Innovative laser surgical technique in urology;
- New applications of laser therapy in urology.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
