Deadline for manuscript
submissions:

closed (20 March 2023)

Message from the Guest Editor

Magnetic resonance imaging (MRI) is an important method to examine the human brain for research and clinical purposes. This Special Issue invites various studies on anatomy, physiology, and clinical applications regarding the MRI of the human brain. For example, virtual surgery on deep brain stimulation, automated segmentation technique, or 3D modeling will be interesting topics. New perspectives on MRI will be incredibly beneficial to researchers in the field and to patients.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
