Mitochondria in Health and Disease

Guest Editors:

Dr. Maria de la Encarnacion Solesio Torregrosa

Department of Biology, Rutgers-Camden, NJ 08102, USA

Dr. Giuseppe Federico Amodeo

Department of Neurology, Columbia University, New York, NY. USA

Deadline for manuscript submissions: **closed (10 November 2021)**

Message from the Guest Editors

This Special Issue aims to present recent advances on the mechanisms that regulate mitochondrial physiology and on those that drive mitochondrial dysfunction and failure in pathological conditions. Mitochondria play a key role in a wide variety of interconnected processes which are crucial for cellular survival, such as energey metabolism, calcium regulation, and apoptosis. Impairments of some of these processes have been broadly described in the etiopathology and in the consequences of many diseases.

Authors are invited to submit their latest results in mitochondrial research. Works conducted under physiological and/or pathological conditions are welcome. Potential topics of interest include but are not limited to: molecular structure of mitochondria and mitochondrial pores and channels, mechanisms of bioenergetics regulation and failure, characterization of mitochondrial dysfunction in various diseases, activation and regulation of apoptotic pathways and/or mitophagy.

Editor-in-Chief

Prof. Dr. Giulio Nicola CerulloDipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
