

## Multi-Agent Systems

Guest Editors:

**Prof. Dr. Vicent Botti**

**Prof. Dr. Andrea Omicini**

**Dr. Stefano Mariani**

**Prof. Dr. Vicente Julian**

Deadline for manuscript  
submissions:

**closed (31 August 2018)**

### Message from the Guest Editors

Multi-agent systems allow the development of distributed and intelligent applications in complex and dynamic environments. Systems of this kind have a crucial role in life evidenced by the broad range of applied areas involved in their use, including manufacturing, management sciences, e-commerce, biotechnology, etc.

The purpose of this Special Issue is to make known some of the advances made in this paradigm and try to show the current state of this technology by analyzing different aspects, as well as its possible application to various domains. In this review of the current state, it is not intended to make an exhaustive exploration of all the current existing works, but rather to try to give an overview of the research in agent technology, showing the high-level of activity of this area.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
