Message from the Guest Editors

The aim of this Special Issue is to document new applications along with their theoretical roots, especially in those topics where a sharp division between the two contributions is not possible.

The proposed Special Issue, named “Signal and Image Processing: from Theory to Applications”, includes (but is not limited to) the following topics:

- Mathematical methods and models for Signal and Image processing;
- Inverse problems in Signal and Image processing;
- New Applications in Signal and Image processing;
- Neural networks.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
