

Application of Machine Learning, Artificial Intelligence, Deep Learning and Big Data Analysis in Nanofluids and Nanoparticles Design

Guest Editors:

Dr. Mohammad Hossein Ahmadi

Faculty of Mechanical Engineering, Shahrood University of Technology, Shahrood 3619995161, Iran

Prof. Dr. Giulio Lorenzini

Department of Industrial Engineering, University of Parma, Parma, Italy

Prof. Dr. Mikhail Sheremet

Laboratory on Convective Heat and Mass Transfer, Tomsk State University, Lenin Ave, 36, 634050 Tomsk, Russia

Deadline for manuscript submissions:

closed (31 December 2022)

Message from the Guest Editors

Nanofluids and nanoparticles, namely, metal oxide nanoparticles, nanotubes, graphenes, quantum dots, protein nanoparticles, and topological materials. These materials could be widely used in different areas such as drug delivery, biomedical engineering, tissue engineering, heat transfer engineering, fuel engineering, computing, etc. However, there is a great amount of experimentally measured data which are not analyzed and evaluated with new analysis approaches. We propose, therefore, a new Special Issue that covers both experimental methods and novel data analysis approaches for being employed to predict the properties and to evaluate the nanotoxicity of nanomaterials, etc. In this Special Issue, we cordially accept submission of all related studies in the fields of nanotechnology that investigate the problems through either experimental methods or data analysis approaches.

Keywords: Computational nanosciences; Nanoparticles; Nanotoxicity; Nanomaterials; Machine learning; Artificial intelligence methods; Deep learning; Prediction; Data preparation

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
