## Non-Destructive Testing of Materials and Structures

Guest Editors:

**Dr. Dwayne McDaniel**

Department of Mechanical and Materials Engineering, Florida International University, Miami, FL 33174, USA

**Prof. Dr. Cesar Levy**

Department of Mechanical and Materials Engineering, Florida International University, Miami, FL 33199, USA

Deadline for manuscript submissions:

**closed (31 December 2022)**

### Message from the Guest Editors

Dear Colleagues,

As the design and development of advanced materials and complex structures continue to progress, so does the need to understand the health, durability and aging of systems utilizing these materials and structures. Non-destructive testing (NDT) historically provides a means to assess the health of structures non-invasively, by identifying anomalies, defects or thinning that could threaten the integrity of the structures.

The intent of this Special Issue is to highlight advancements in NDT methods, including novel approaches and innovative applications for a broad range of industries. We invite you to submit original articles on topics that include, but are not limited to:

- Novel and experimental NDT methods that may impact the future of non-destructive methods
- Challenging applications of NDT methods on complex structures
- Deployment and integration of NDT tools in constrained or hazardous environments
- NDT methods for assessing advanced materials
- NDT-related inverse problems

## Editor-in-Chief

### Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
