Nondestructive Testing in Composite Materials

Guest Editor:

Dr. Carosena Meola
Department of Industrial Engineering, University of Naples Federico II, 80125 Napoli, Italy

Deadline for manuscript submissions:
closed (31 October 2019)

Message from the Guest Editor

Composite materials are ever-more-increasingly employed in many application. Their success is mainly due to their high strength-to-weight ratio, easy formability and relatively low costs. However, being composites made of two or more basic materials and manufactured through complex processes involving temperature, pressure, chemical reaction, etc., it may be expected the final product to be affected by anomalies. Therefore, effective non-destructive evaluation methods able to discover defects at an incipient stage are necessary to either assure the quality of a composite material prior to putting it into service, or for monitoring a composite structure in service.

This Special Issue of *Applied Sciences* on "Nondestructive Testing in Composite Materials" aims to attract contributions covering all the applicable nondestructive testing techniques.

- Composites
- Bio-composites
- Ceramic matrix
- Metal matrix
- Polymeric matrix
- Thermoset matrix
- Thermoplastic matrix
- Nondestructive testing
- Nondestructive evaluation
- Acoustic emission
- Infrared thermography
- Penetrant liquids
- Radiography
- Ultrasonics

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
