

## Recent Advances in Land Use and Spatial Planning in Urban and Rural Areas

Guest Editors:

**Dr. Monika Balawejder**

Faculty of Technical Engineering,  
State University of Applied  
Sciences in Jarosław, 37-500  
Jarosław, Poland

**Dr. Agnieszka Bieda**

Department of Photogrammetry,  
Remote Sensing of Environment  
and Spatial Engineering, Faculty  
of Geo-Data Science, Geodesy,  
and Environmental Engineering,  
AGH University of Krakow, 30  
Mickiewicza Av., 30-059 Krakow,  
Poland

Deadline for manuscript  
submissions:

**20 August 2025**

### Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to collect in one place the most modern methods of shaping spatial development and tools for modifying techniques, parameters and land development. And it will explore new perspectives in recent advances in land use and 3D spatial planning and landscape protection.

The topics that will be discussed in this Special Issue will focus not only on modern methods, technologies and further land use and spatial planning, but will also extend to spatial development in the process of land consolidation, which is the basis for achieving sustainable development. Further, it will concern proposals for new administrative and legal procedures aimed at improving the quality of urban and rural areas.

We would like to encourage scientists to cooperate in the creation of a Special Issue of Applied Sciences. We invite researchers involved in spatial planning, urban planning, geodesy, GIS, real-estate management, revitalization, environmental protection, landscape architecture, economics, spatial management, law and all other related fields to participate in our research.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**

Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
