Message from the Guest Editor

Dear Colleagues,

Two-dimensional (2D) materials are an emerging platform with promising properties for optics, including transferability, stretchability, heterogeneous device assembly, and straightforward integration with complex chip architectures. Photonics based on two-dimensional (2D) materials have made incredible progress in recent years and now set the state-of-the-art for a number of applications as integrated light sources, modulators, and detectors.

For this Special Issue, we invite authors to contribute original research as well as review articles on recent advances made on the understanding, characterization, and employment of the optical properties of 2D materials. Potential areas include but are not limited to:

- Integrated active optical components based on 2D materials;
- Light–matter interaction in 2D materials;
- Strong coupling regime and polariton resonances in 2D materials;
- Quantum emitters;
- Active defects in 2D material lattices;
- Plasmonic in 2D systems;
- Sensing with 2D materials;
- Near-field spectroscopy;
- Ultrafast phenomena in 2D materials;
- 2D heterostructures and applications;
- Intra- and inter-layer excitons in TMDs.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
