Deadline for manuscript submissions:

closed (10 August 2021)

Message from the Guest Editor

Dear Colleagues,

Petroleum Data Analytics (PDA) is the application of Artificial Intelligence and Machine Learning in petroleum engineering-related problem solving and decision-making. PDA will fully control the future of science and technology in the petroleum industry. It is highly important for the new generation of engineers, scientists, and petroleum professionals to develop a realistic scientific understanding of this technology.

Similar to the application of Artificial Intelligence and Machine Learning in other engineering-related disciplines, Petroleum Data Analytics addresses two major issues that determine the success or failure of this technology in petroleum industry: (a) differences in how AI and ML should be applied to engineering versus non-engineering-related problems and decision-making, and (b) how AI and ML is differentiated from traditional statistical analysis. Lack of success or mediocre outcomes of AI and ML in petroleum industry has been quite common. To a large degree, this has to do with a superficial understanding of this technology by some petroleum engineering domain experts and concentration on marketing schemes rather than science and technology.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
