Functional Properties in Preharvest and Postharvest Fruit and Vegetables

Guest Editors:

Dr. Gang Ma

Department of Bioresource Sciences, Faculty of Agriculture, Shizuoka University, 836 Ohya, Suruga, Shizuoka 422-8529, Japan

Prof. Dr. Masaya Kato

Department of Bioresource Sciences, Faculty of Agriculture, Shizuoka University, 836 Ohya, Suruga, Shizuoka 422-8529, Japan

Prof. Dr. Pongphen Jitareerat

Postharvest Technology Program, School of Bioresources and Technology, King Mongkut's University of Technology Thonburi, 126 Bangmod, Thungkru, Bangkok 10140, Thailand

Deadline for manuscript submissions: closed (31 March 2022)

Message from the Guest Editors

Consumption of fruit and vegetables not only provides basic nutrition for humans but also has potential healthpromoting effects in reducing inflammation and preventing chronic diseases. Due to the health benefits, the accumulation of bioactive compounds and functional properties of fruit and vegetables have attracted more and more attention of researchers in the horticulture field. In recent years, it has been well recognized that the accumulation of bioactive compounds is subject to complicated regulation with dynamic changes in the composition in response to developmental and postharvest stimuli. To date, although progress has been made in understanding the accumulation of bioactive compounds in plants, the elucidation of the molecular mechanisms and key regulators involved in biosynthesis in bioactive compounds is still challenging. In-depth research into the biosynthesis of bioactive compounds and the development of novel preharvest and postharvest technologies are of great importance, which will contribute to improving the accumulation of bioactive compounds and enhancing the nutritional and commercial values of fruit and vegetables.

Editor-in-Chief

Message from the Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec,

CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
