Message from the Guest Editors

Dear Colleagues,

Compounds of synthetic origin are widely used in cosmetics. A large proportion of raw materials of synthetic origin are effective. Nowadays, we observe a tendency for manufacturers to produce natural cosmetics that have beneficial properties for the body. Natural cosmetic formulas are produced in a sustainable development process, ensuring not only safe effects for the skin but also for the environment. Eco-production uses trends related to upcycling, less water usage, zero waste and fair trade. They are often considered gentler and safer for the skin compared to synthetic ingredients, and many consumers are willing to pay a higher price for natural and organic cosmetics. As part of this endeavor, this Special Issue includes research and review articles by researchers working on comparing the effectiveness of synthetic and natural cosmetics.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
