Network Intrusion Detection and Attack Identification

Guest Editors:

Dr. Sin Gee Teo

Cybersecurity Department,
Institute for Infocomm Research,
A*STAR Singapore, Singapore
138632, Singapore

Prof. Dr. Rongxing Lu

Faculty of Computer Science,
University of New Brunswick,
Fredericton, NB E3A 0A1, Canada

Dr. Ruitao Feng

School of Computing and
Information Systems, Singapore
Management University,
Singapore 188065, Singapore

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Network security is becoming more and more complicated and challenging than ever with the emergence of the IoT, 5G and beyond networks.

This Special Issue encourages artificial intelligence and security researchers and practitioners to submit their novelty solutions for the robustness, reliability, explainability, trustworthiness, and adaptability of AI-based Network Intrusion Detection and Attack Identification models with corresponding network traffic datasets.

Topics of interest include, but are not limited to:

- AI-based Network Attack Detection, Classification and Mitigation;
- Threat Detection and Mitigation using MITRE ATT&CK;
- Robust and Reliable Attack Detection and Identification;
- AI-based Network Attack Generation and Defense;
- Adversarial Learning for Network Intrusion Detection;
- Interpretable Network Intrusion Detection;
- Next-generation of Network Intrusion Detection and Attack Identification Systems;
- Unsupervised Network Anomaly Detection;
- Network Anomaly Detection with Domain Adaption;
- Network Anomaly Detection based on Transfer Learning.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
