# **Nonlinear Dynamics and Control for Aerospace Robotics**

Guest Editors:

#### Prof. Dr. Ming Xu

School of Astronautics, Beihang University, Beijing 100191, China

#### Dr. Xiaoyi Wang

School of Mechanical and Manufacturing Engineering, University of New South Wales, Sydney, NSW 2052, Australia

Deadline for manuscript submissions: 10 February 2025

#### Message from the Guest Editors

Throughout the history of space exploration, robots have been essential in accomplishing various tasks. Aerospace robots with complex nonlinear dynamics are crucial for onorbit servicing missions such as docking, repairing, transporting, refueling, assembling, and capturing noncooperative objects. Therefore, modeling and precisely controlling the nonlinear dynamics of aerospace robots is increasingly important for the successful execution of these missions. All original research and review articles that present advanced methods for space robots in dynamic modeling, simulating, controlling, etc., are welcome.

This Special Issue aims to compile cutting-edge research and innovative solutions in areas such as dynamic modeling, design and optimization, advanced control methods, motion planning, experimental studies, and artificial intelligence applications for space robots. We welcome all papers that include new studies and technologies applicable to space robotics.

## **Editor-in-Chief**

#### Message from the Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo** Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec,

CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
