Recent Advance and Future Trends in Rehabilitation and Nursing-Care Robots

Guest Editors:

Prof. Dr. Yuko Ohno
Division of Robotics & Design for Innovative Healthcare, School of Medicine, Osaka University, Osaka Prefecture 565-0871, Japan

Dr. Jeong Hieyong
Division of Robotics and Design for Innovative Healthcare, School of Medicine, Osaka University, Osaka Prefecture 565-0871, Japan

Deadline for manuscript submissions:
closed (30 September 2019)

Message from the Guest Editors

For any child, playing, eating and sleeping is absolutely necessary. It supports children's daily mind and body recovery, in other words, "rehabilitation". The same can be said of people of all ages. The best nursing care is also playing, eating, and sleeping.

In this Special Issue, we will display imaginative approaches and innovative methods that shape the best "rehabilitation" and "nursing care". Topics will include robotics, medical engineering, nursing, rehabilitation, cognitive science, emotional engineering, and AI. We welcome unpublished papers from researchers in any field.

The following lyrics may help to stimulate your ideas.

Every breath you take, every move you make, every step you take,

We'll be watching you

Every word you say, every game you play, every bond you break,

We'll understand and help you.

- non-invasive and free monitoring
- evaluation for rehabilitation
- evaluation for nursing-care
- voluntary rehabilitation

Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
