Message from the Guest Editor

Energy storage is a key topic for the further deployment of renewable energy production, and, therefore, a large research effort is being made to find innovative solutions. Besides battery and other types of electrical storage, electrofuels and bio-electricity may offer suitable alternatives in some specific scenarios. E-fuels are currently being studied for their potential to supply sectors which are strongly dependent on liquid fuels, such as aviation. At the present stage of their development, technical and costs issues are burdens for their application to large-scale infrastructures. In spite of these present challenges, the further development of cutting-edge technologies is one of the pillars for directing the world on the path of a low-carbon future.

This Special Issue is looking for contributions on the following topics: cutting-edge energy conversion technologies and energy storage, technologies integration, e-fuels, pilot and large-scale applications.

Keywords : Energy conversion; Energy storage; Technologies integration; E-fuel; Renewable energies; Pilot plants

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
