Message from the Guest Editors

Dear Colleagues,

Multiport converters play a significant role in the modern energy system and EV industry. The global demand for integration of renewable energy sources into a DC microgrid system leads to the necessity of optimized and more sophisticated multiport systems.

We invite papers by the following:

- Technical, economic, and environmental assessment of multiport converter applications for renewable energy systems (including domestic, community, and industrial);
- Novel methods and innovative approaches to power conversion and optimization for various multiport converter systems (theory with modelling and/or practice with implementations and case studies);
- Optimization techniques for control strategies including efficiency, reliability, and cost;
- Protection and robustness for multiport converters.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
