### Message from the Guest Editors

We solicit previously unpublished or modified papers offering meaningful research contributions on any aspect of security or privacy. Your papers may present advances in the theory, design, implementation or analysis of the attack, defense, protection, response and vulnerability, verification, or empirical evaluation and measurement, of secure systems.

### Topics include but are not limited to the following:

- Access control, authorization and authentication;
- Application, network, system, web, software, hardware, IoT and cloud security;
- Attacks and defenses;
- Intrusion detection and prevention
- Privacy technologies and mechanisms;
- Digital, network, malware, system forensics;
- Secure information flow;
- Security and privacy for the Internet of Things;
- Security and privacy metrics;
- Security and privacy policies;
- Security architectures;
- Moving target defense;
- Cyber deception and decoy techniques;
- Malware and unwanted software;
- Machine learning and AI security;
- Protocol security;

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
