submissions:

closed (30 November 2022)

Message from the Guest Editors

Dear Colleagues,

We cordially invite you to contribute to this Special Issue titled “Applications of Novel Sensory Methods for Innovative Food Products”, a current topic that has received the interest of many researchers. Although it is a recent discipline, the sensory evaluation of foods and beverages is rapidly developing due to its high interdisciplinary profile, recent and rapid technological advances, and the continuous changes in consumers’ lifestyles. Sensory science is one of the four most important pillars in the development and quality control of food products. Food and beverage producers face many challenges, including continuous changes in the quality of the raw materials due to global warming and the incorporation of novel/unconventional raw materials. Therefore, food and beverage companies are investing more and more in sensory studies and research in order to develop successful products on the market.

We invite authors to submit unpublished, original, and high-quality work on this topic, as well as review papers on related issues and challenges.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
