Yamaguchi 755-8505, Japan

Deadline for manuscript
submissions:

closed (10 February 2023)

Message from the Guest Editor

Dear Colleagues,

We are inviting submissions to this Special Issue on “Spine and Spinal Cord Biomechanics and Rehabilitation”.

Spinal cord injuries are directly related to quality of life. The development of diagnostic and therapeutic methods for the spine and spinal cord is an important area for maintaining quality of life. In the field of spine and spinal cord, regeneration and alignment research has been very active in recent years, but a wide variety of other research exists as well.

In this issue, we will focus on spinal cord and spine biomechanics, computer simulation, and rehabilitation research. We believe that such research will eventually lead directly to the establishment of safe treatment methods and improvement in the quality of life of patients.

We invite submissions exploring clinical and experimental research in the fields of Spine and Spinal Cord Biomechanics and Rehabilitation.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
