

Sustainable Environmental Remediation Technologies

Guest Editors:

Prof. Sabino De Gisi

Department of Industrial Engineering, Section of Chemical Engineering, University of Salerno, Via Giovanni Paolo II n. 132, 84084 Fisciano, SA, Italy

Prof. Dr. Michele Notarnicola

Department of Civil, Environmental, Land, Building Engineering and Chemistry (DICATECH), Polytechnic University of Bari, Via E. Orabona n. 4, 70125 Bari, Italy

Dr. Francesco Todaro

Department of Civil, Environmental, Land, Building Engineering and Chemistry (DICATECH), Polytechnic University of Bari, Via E. Orabona n. 4, 70125 Bari, Italy

Deadline for manuscript submissions:

closed (30 April 2022)

Message from the Guest Editors

This Special Issue is dedicated to discussing the new developments and challenges in remediation technologies for sustainable applications. The aim is to address knowledge gaps and lead to the advancement of new knowledge on sustainable remediation technologies, by analyzing different aspects such as the following:

- Air pollution and treatment;
- Emerging pollutants remediation;
- Environmental pollution and remediation;
- Environmental risk assessments;
- Fate of contaminants in the environment;
- Green technologies for remediation of contaminated sites;
- Life cycle assessment (LCA) and environmental impact assessment (EIA);
- Materials for remediation;
- Planning aspects;
- Pollution and health issues;
- Reconversion of industrial areas;
- Sediment pollution and treatment;
- Social aspects of remediation;
- Soil pollution and treatment;
- Water pollution and treatment;
- Toxicity of contaminants and remediation technologies.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
