MK43 0AL, UK

Message from the Guest Editors

Over 130 countries have committed to becoming carbon neutral by 2050. To achieve such an ambitious goal, scientists and engineers need to drive the research and be at the forefront of this sustainability challenge, looking to embrace new materials, technologies, and manufacturing techniques to aid the worldwide drive towards this target. Therefore, this Special Issue invites papers on the current and future developments within this area across all disciplines of science and engineering. Topics of interest include but are not limited to the following:

Deadline for manuscript
submissions:

27 January 2025

- Natural materials and fibres
- Sustainable design
- Sustainable technologies and processes
- Emerging and future challenges
- Recycling and reuse of complex materials
- Modelling

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
