Message from the Guest Editor

Dear Colleagues,

Even today, novel pharmacological and technological applicative therapies, in the field of cancer treatment, are very current. In particular, much research is focused on direct treatments that could be performed on some forms of solid tumors, potentially without removing them. Therefore, it is useful to discover new synthetic and natural molecules and controlled release systems in which to incorporate them. The antioxidant aspect of these molecules is also important, bearing in mind that reactive species are always responsible for them.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
