Olsztyn, Poland

Deadline for manuscript  
submissions:

**20 February 2025**

### Message from the Guest Editors

Meat producers worldwide are challenged to provide nutritious and safe meat that appeals to consumers' sensory, ecological and ethical considerations. Therefore, producers, processors, and scientists are seeking to improve the broadly understood quality of meat. This issue is essential due to the current trends in meat consumption, where high and repeatable quality (nutritional value, sensory, hygienic quality) and environmental aspects take priority over price. Therefore, it is crucial to implement different strategies and technological processes to improve the quality of meat in the context of both consumer preferences and sustainable production.

This Special Issue, "Recent Processing Technologies for Improving Meat Quality", aims to present recent findings on technological factors that affect the final quality of meat, both in the sphere of production system and post-slaughter processing, i.e., ageing, packaging, cooking methods, etc.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**

da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
