### Message from the Guest Editors

This Special Issue welcomes the submission of articles that show the advances in technology in agronomic engineering and help to meet the challenges posed.

Topics covered by the Special Issue include:

- Power and machinery;
- Land and water use and environment;
- Agricultural building;
- Automation and emerging technologies, precision agriculture;
- Information systems and precision farming;
- Livestock technology;
- Energy and non-food production technology;
- Fruit and vegetable cultivation systems;
- Processing and post-harvest technology and logistics.

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
