Message from the Guest Editors

Dear Colleagues,

Dentistry is a constantly evolving field. All disciplines today are increasingly interdependent on each other, and the modern treatment plan must be set by a multidisciplinary team. In recent years, the introduction of increasingly cutting-edge technologies (intra- and extra-oral scanners and cone beam computed tomography) and the development of minimally invasive surgical techniques have led to guaranteeing patients treatment with ever less discomfort and with incredible aesthetic results. From this point of view, modern dentistry is changing its workflow.

The aim of the present Special Issue is to present updates in oral surgery, oral health, periodontology, prosthetic dentistry, and implantology, with particular attention given to the use of novel technologies and materials.

Dr. Luca Sbricoli

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
