

Antenna Design and Microwave Engineering

Guest Editors:

Prof. Dr. Youngkyun Cho

Department of Electronics
Engineering, Chungnam National
University, Daejeon 34134,
Republic of Korea

Dr. Jungnam Lee

Electronics and
Telecommunications Research
Institute (ETRI), Daejeon 34129,
Republic of Korea

Deadline for manuscript
submissions:

20 October 2024

Message from the Guest Editors

Antennas are the vital interface between electromagnetic waves and electronic systems, and their design is paramount for the efficient transmission and reception of data, be it for wireless communication, radar systems, satellite technology, or emerging IoT applications. Microwave engineering, on the other hand, plays a pivotal role in the development of high-frequency electronic components and systems, enabling seamless connectivity and high-speed data transfer.

This Special Issue brings together a diverse array of contributions covering topics ranging from novel antenna designs and modeling techniques to microwave components, advanced materials, and cutting-edge applications. We aim to stimulate discussions, inspire creativity, and foster collaboration in these rapidly evolving fields. We hope that the research presented here will inspire further progress and innovation in antenna design and microwave engineering.

We express our gratitude to all the authors for their valuable contributions and look forward to a rewarding exploration of the contents within this Special Issue.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
