Message from the Guest Editors

Dear Colleagues,

We are happy to present a new Special Issue with the tentative title "Current Advances in Orthodontic Treatment: From Biomaterials to Digital Techniques". In the last few years, new diagnostic and therapeutic approaches have been developed in orthodontics. The change in orthodontics is dictated both by the patient's expectations and by the professional's requests to become more predictable in the planning of orthodontic treatment.

Thus, for the upcoming Special Issue, we are delighted to invite investigators to submit original research articles (trials, cohort studies, and case-control and cross-sectional studies), literature reviews (narrative or systematic reviews and meta-analyses), and high-quality case reports, all focusing on new orthodontic techniques or clinical solutions.

Prof. Dr. Silvia Caruso

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
