Deadline for manuscript submissions:
closed (30 March 2020)

Message from the Guest Editor

Dear Colleagues,

Nowadays, large amounts of data pertaining to the generation, transmission, and consumption of electricity are collected. Leveraging these data streams to produce advanced analytics can facilitate the transition towards more intelligent grids. To this end, artificial neural networks (ANNs) are able to learn complex relationships based on recorded data and generalize what they have learned. ANNs have already been applied in Smart Grids related research, such as in asset management, forecasting methods, reliability assessment, state estimation, and data-driven decision-making systems. However, significant challenges concerning information management, privacy, as well as the vulnerability and robustness of such techniques to malicious data still remain. This Special Issue of *Applied Sciences* will focus on state-of-the-art research on the use of ANNs in Smart Grids, addressing existing challenges and bringing forward new problems.

IMPACT FACTOR 2.5

CITESCORE 5.3

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
