

Bone, Tissue Regeneration and Biomaterials

Guest Editor:

Dr. Ippokratis Pountos

Academic Department of Trauma
& Orthopaedics, School of
Medicine, University of Leeds,
Leeds LS2 9LU, UK

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editor

Over the last few decades, tissue engineering has proposed solutions that can overcome the limited availability of bone grafts. These approaches range from stimulating a stronger bone regeneration response to producing custom-made personalised grafts with the use of 3D bioprinting. The aim of this Special Issue is to summarise the advances in the field and propose areas that merit further exploration in the near future.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
