Message from the Guest Editors

Terrestrial and marine plants are abundant resources for the discovery of new structurally diverse and biologically active compounds that have attracted the attention of the scientific community.

This Special Issue provides a venue for the publication of review or research articles describing the chemical constituents (including polyphenols, aminoacids, fatty acids, terpenes, amongst others) and biological activity of selected terrestrial and marine plants, to evaluate their use as functional foods and/or for producing products for the pharmaceutical, medical, cosmetic, food and agrochemical industries.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
