Deadline for manuscript
submissions:

closed (20 October 2022)

Message from the Guest Editors

We are inviting submissions to the Special Issue on monitoring and data collection of pests.

Many efforts are devoted to overcoming the anthropogenic damage to the environment via the excessive implementation of toxic insecticides. Accurate monitoring of pests' population sizes during their life history may allow the use of hazardous insecticides to be reduced. Using a decision support system based on precision agriculture, pest physiology, communication and behavior (chemical, visual, acoustic), GIS technologies, machine learning, etc., may allow accurate data collection and the evaluation of forecast models.

In this Special Issue, we invite submissions exploring cutting-edge research and recent advances in the fields of monitoring and data collection of pests. Both theoretical and experimental studies are welcome, as well as comprehensive reviews and survey papers

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
