Epidemiology, University of
Thessaly, 41222 Larissa, Greece

Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

Dear Colleagues,

Epidemiology is recognized both as the science basic to preventive medicine and one that informs the public health policy process. Several operational definitions of epidemiology have been suggested. Epidemiology is the study of the occurrence of disease or other health-related characteristics in human populations. In addition, public health has been defined as the science and art of preventing disease, prolonging life, and promoting health through organized efforts of society.

Both epidemiology and public health have a long history of applying a statistical approach to problem solving, and many innovations in statistical methodology have arisen from these disciplines. We are happy to announce this Special Issue of *Applied Sciences* entitled “Epidemiology and Public Health 2020” and look forward to receiving your submissions.

Assoc. Prof. George Rachiotis

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
