Deadline for manuscript submissions:

closed (15 November 2022)

Message from the Guest Editors

Dear Colleagues,

A fuzzy system is any fuzzy logic-based system, which uses fuzzy logic as the basis for knowledge representation, using different forms of knowledge. A fuzzy neural network is a learning machine that finds the parameters of a fuzzy system by exploiting approximation techniques from neural networks. In particular, currently developed theory and applications of fuzzy systems and fuzzy neural networks, and both fuzzy systems and fuzzy neural networks have some things in common. They can be used for solving various types of problems in the areas of economics, business, engineering, management, etc.

The main purpose of this Issue is to publish original research articles covering advances in the modeling of hybrid fuzzy systems, and applications of fuzzy neural networks contributing to engineering, industries, electronics, and communications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
