submissions:

closed (15 April 2022)

Message from the Guest Editors

Gene therapy has been considered the holy grail for the treatment of inherited diseases. This approach became possible through the advances of genetics and bio-engineering that enabled the manipulation of viral vectors for the delivery of extra-chromosomal material to target cells. The viruses are more often investigated due to their efficiency of invading cells and inserting their genetic material. However, there is great concern regarding exacerbated immune responses toward the injected vectors and genome manipulation, especially in germ line cells. Moreover, some limitations (i.e. neutralizing antibody, tissue tropism, loading capacity) of viruses boosted the research in the development of alternative non-viral delivery strategies that are currently under investigation, but far from being optimized. Overall, despite in vivo studies showed satisfactory results with approved protocols in clinical trials for various inherited diseases, gene therapy technology still needs supporting experimental evidences, with lights and shadows that need further investigation/optimization.

Keywords: Gene therapy; viral vectors; gene delivery; genome/base editing; cell therapy

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
