Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to publish a collection of research contributions illustrating the most recent advances in advanced materials for green spintronics. We hope to present a collection of papers that will be of interest to scholars in this field. Contributions in the form of original research papers, reviews, and short communications on any aspect of advanced materials for green spintronics are welcome.

You may choose our Joint Special Issue in *Magnetochemistry*.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
