Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Applied Sciences*, “**Nanocomposites for the Sustainable Environment**,” has the aim of collecting recent advances in the application of various nanocomposites for sustainable environment remediation including inorganic, organic and biomolecules sanitation from water, soil, air, and food.

Papers are welcome on the following topics and their applications towards sustainable environment:

- Metal/Metal Oxide Nanocomposites
- Polymer/Non-Polymer-Based Nanocomposites
- Polymer/Ceramic Nanocomposites
- Inorganic/Organic Hybrid Nanocomposites
- Polymer/ Layered Silicate Nanocomposites
- Polymer/PolymerNanocomposites
- Carbon Nanotube-BasedNanocomposites
- Noble Metal Based Nanocomposites
- Nanocomposites for Bioremediation
- Biogenic/Phylogenetic Nanocomposites
- Graphene/Graphene Oxide-Based Nanocomposites
- Nanocomposites in Environmental Analysis
- Nanomaterials in Sample Preparations

Prof. Dr. Janardhan Reddy Koduru

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
