Sanandaj, Kurdistan, Iran

Deadline for manuscript  
submissions:

**closed (20 May 2022)**

### **Message from the Guest Editors**

Dear Colleagues,

Granite is a major and important component of the continental crust, and it is a characteristic rock of the Earth. Over the years, there has been a great deal of research conducted on the formation process of granite. Recent advances in analytical instruments and technology have led to the new discovery of origin and petrogenesis of the granitic rocks, not only on the Earth, but also outside of the Earth. The aim of this Special Issue is to reveal the petrogenesis of granitic rocks or related rocks from a wide range of applied sciences, including geology, petrology, geochemistry, and analytical sciences. These studies will contribute to clarifying the formation process of the continental crust of the Earth.

Prof. Motohiro Tsuboi

Prof. Dr. Hossein Azizi

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
