

## Feature Review Papers in "Robotics and Automation" Section

Guest Editors:

**Prof. Dr. Dimitris Mourtzis**

Department of Mechanical Engineering and Aeronautics, University of Patras, Rio Patras 26504, Greece

**Prof. Dr. Panagiotis Stavropoulos**

Laboratory for Manufacturing Systems and Automation, University of Patras, 26504 Patras, Greece

**Dr. Nikos Panopoulos**

Department for Mechanical Aeronautics and Engineering, University of Patras, 26504 Patras, Greece

### Message from the Guest Editors

Industry 4.0 is a manufacturing concept which promotes the digitization and digitalization of manufacturing and production systems and networks in an attempt to achieve more efficient Human-Robot Collaboration (HRC). Consequently, several new technologies, among them being Cloud Computing, 5G networks, and Artificial Intelligence, are employed for creating knowledge and to help engineers to design, develop, and implement more robust decision-making frameworks. Automation and robotics are two main research areas moving us towards the realization of Smart Factories. To that end, automation systems play a very important role in the field of manufacturing, especially under the framework of Industry 4.0, which includes the use of various Information and Communication Technologies (ICT), infrastructure, and control systems such as Smart Machinery, Cyber-Physical Machine Tools (CPMTs), Robotics, Processes in factories, and other applications.

Deadline for manuscript submissions:

**20 February 2025**

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**  
Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
