### Message from the Guest Editors

Dear Colleagues,

In recent years, there has been an increased presence of new surface treatments and modifications in the world of dental implantology. The introduction of new surfaces, high-performance materials, and cleaning protocols has had a decisive impact on the daily routine of dental practice.

The aim of this Special Issue on “**Enhancement of Titanium Dental Implant/Abutment Surfaces**” is to collect all the latest innovations in the field of titanium implant surfaces. Reviews, clinical studies, original research articles, communications, and concept papers that are relevant to the topic will be accepted.

In particular, priority will be given to new surface treatments, implant and abutment surface modifications, and cleaning protocols.

It is our great pleasure to invite you to submit a manuscript to this Special Issue.

For further reading, please visit the ***Special Issue website***.

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
