Message from the Guest Editor

Dear Colleagues,

I was recently invited to serve as the Guest Editor of a Special Issue of *Foods* on “Toxicants and Contaminants in Food”—an invitation I readily accepted, as I strongly believe food safety is a key multidisciplinary knowledge and research area with a global impact. Chemical contaminants may be in food or feed due to food production, distribution, packaging, or consumption. They might also be present in the environment naturally or as a result of human-made activity.

Therefore, it is my pleasure to invite you to contribute to this Special Issue by submitting papers on original research work or reviews. The following topics are especially welcome: innovation/development in techniques/methods, agrochemical residues and pesticides, natural toxins, allergens, produced toxic compounds during food processing, environmental contaminants, pesticides, veterinary drug residues, emerging issues and hazards, exposure studies, risk assessment studies, managing strategies in food safety, regulatory framework, and adverse impact on both public health and economy.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
