Frontier Research in Waters, Air and Wastes

Guest Editors:

Dr. Marco Carnevale Miino

Department of Theoretical and Applied Sciences, University of Insubria, Via J.H. Dunant 3, 21100 Varese, Italy

Dr. Maria Cristina Collivignarelli

Department of Civil Engineering and Architecture, University of Pavia, 27100 Pavia, Italy

Dr. Alessandro Abbà

Department of Civil, Environmental, Architectural Engineering and Mathematics, University of Brescia, 25121 Brescia, Italy

Deadline for manuscript submissions:

closed (30 December 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to collect up-to-date papers that explore the last innovations in waters, air, and waste. Potential topics include but are not limited to the following:

Waters: Drinking water and wastewater treatment, emerging contaminants, water scarcity, residues of water treatment characterization and disposal, sludge reuse options, wastewater-based epidemiology, waters characterization, advanced oxidation processes, treatment plants optimization, and direct and indirect effects of COVID-19 on quality and treatment of waters and residues.

Air: Air pollution in the urban environment, outdoor and indoor air pollution, traffic and industrial pollution, strategies for reducing air emissions, modelling of the dispersion of atmospheric pollutants, indoor air treatment, effects of lockdown for COVID-19 in urban and rural environment, and influence of air pollutants in COVID-19 spread.

Waste: Solid and aqueous waste characterization, waste collection and treatment, recycling, material reuse, energy recovery, direct and indirect effects of COVID-19 on solid waste quality, and feasible disposal options.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
