Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

Dear Colleagues,

We are inviting submissions to this Special Issue on Wind Generators: Technology and Trends. The penetration of renewable energy sources such as wind power generation and PV power generation into power systems has been increasing significantly all over the world. Especially, wind power generation has attracted a great deal of attention due to its superior characteristics such as low cost and high energy conversion efficiency. In this Special Issue, we invite papers about cutting-edge research and advances in the field of wind power generation systems. Theoretical and experimental studies as well as comprehensive review and survey papers are welcome. Examples for specific subjects are given in the keywords.

Dr. Junji Tamura

Dr. Masaki Yagami

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
