Applications of 2D Semiconductors

Message from the Guest Editors

The field of 2D semiconductors has rapidly expanded, discovering rich and exciting science in atomically thin layers of these compounds with finite bandgaps in the range from far infrared to deep ultraviolet. These materials exhibit outstanding electrical and optical properties originating from their unique thickness-dependent band structures, which make them highly desirable for applications in future electronics and optoelectronics. The large family of 2D semiconductors is continuously expanding, with new members bringing novel functionalities. This large and ever-growing library of materials enables the selection of optimal 2D semiconductors for specific applications, as well as the development of new device concepts. Furthermore, even greater advantages come from the possibility to engineer new artificial materials by combining their 2D layers together with different stacking sequence and rotational alignment, thus assembling the so-called van der Waals heterostructures with tailored properties.

Keywords

- 2D semiconductors
- van der Waals heterostructures
- photosensors
- flexible electronics
- optoelectronics
- catalysis

Guest Editors

Dr. Zakhar Kudrynskyi

Department of Mechanical, Materials and Manufacturing Engineering, Faculty of Engineering, The University of Nottingham, Nottingham, UK

Dr. Mark Greenaway

Department of Physics, Loughborough University, Loughborough LE11 3TT, UK

Deadline for manuscript submissions

closed (10 November 2021)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
